

CALL TO ACTION

NHS England has launched a major consultation exercise to look into ways in which it can use its limited resources to improve the way in which primary eye care is delivered. There is a 5 question survey that all patients/public can access and respond on line so that answers can be collated easily. Please go to the link: <https://www.surveymonkey.com/s/LW2VMFM> to provide your response, which is completely anonymous.

Many thanks for your consideration
